

SOP 19: Operations and Maintenance of Parks and Open Spaces

Introduction

Parks and open space operations and maintenance activities commonly involve the operation of equipment such as mowers and tractors; disposal of waste from mowing, planting, weeding, raking, pruning, and trash collection; application of pesticides, herbicides, and fertilizers; cleaning and maintenance of park amenities such as play equipment, restrooms, and structures; and snow removal. These activities have the potential to generate contaminants such as sediments and toxic chemicals that may be picked up by rainwater, thereby entering the storm drainage system and receiving waters. The goal of this written Standard Operating Procedure (SOP) is to provide guidance to municipal employees to reduce the discharge of pollutants from the MS4 and to receiving waters as a result of parks and open space operations and maintenance. If services are contracted, this SOP should be provided to the contractor. The contract should specify that the contractor is responsible for compliance with all applicable laws.

The Town of Georgetown performs a variety of operations and maintenance activities at its municipal parks and open spaces.

Instructions: Briefly describe the municipality's current parks and open spaces operations and maintenance activities (i.e., use and storage of fertilizers/pesticides/herbicides, mowing and weeding practices, pet waste collection). Specify whether the municipality uses its own equipment and staff or if work is contracted out. - The town mows and trims weekly using their own equipment and manpower only using the collection system in the fall and dispose of clippings and leaves in their compost pile. None or less than 500lbs of fertilizer is stored in town buildings. There are no licensed applicators so the town sub contracts for pesticide or herbicide application. Pet waste bags are supplied at the East Main St. fields there is a Town bylaw to pick up after your pet.

The Town of Georgetown has created an inventory of all municipal parks and open spaces and will update this inventory annually (refer to the attached inventory).

Procedures

The Town of Georgetown will implement the following procedures at municipal parks and open spaces to reduce the discharge of pollutants from the MS4:

General

- Repair damage to landscaped or mulch or vegetated bare areas as soon as possible to prevent erosion. If there are areas of erosion or poor vegetation, repair them as soon as possible, especially if they are within 50 feet of a surface water (e.g., pond, lake, or river).
- Remove (sweep or shovel) materials such as soil, mulch, and grass clippings from parking lots, streets, curbs, gutters, sidewalks, and drainage-ways.

SOP 19: Operations and Maintenance of Parks and Open Spaces

- Do not clean up any unidentified or possibly hazardous materials found during maintenance; notify a supervisor immediately.

Maintenance

- Wastewater from power washing signs, structures, or bleachers cannot be discharged into the stormwater system.
- When painting park equipment, use a drop cloth and clean up any spills immediately.
- Do not leave open containers on the ground where they may accidentally tip over.
- Sweep parking lots with a street sweeper and dispose of street sweepings in designated areas (see SOP 16: Streets and Parking Lots).
- Never wash debris from parking lots into the storm drain.

Mowing

- Remove debris and trash from landscaped areas prior to mowing.
- Collect grass clippings and leaves after mowing. Do not blow or wash them into the street, gutter, or storm drains.
- Properly recycle or dispose of organic waste after mowing, weeding, and trimming.
- Reduce mowing frequencies wherever possible by establishing low/no-mow areas in lesser-used spaces.
- Brush off mowers (reels and decks) and tractors over grassy areas or in contained washout areas.
- Leave clippings on grassy areas or dispose of them in the trash or by composting.
- Do not hose off mowers over paved areas that drain into the MS4 or directly to surface waters.
- Follow proper vehicle and equipment maintenance procedures to prevent leaks (see SOP 21: Operations and Maintenance of Municipal Vehicles and Equipment)
- Do not allow grease from mowers to fall onto areas where they can be washed into the stormwater system.

Irrigation

- Repair broken sprinkler heads as soon as possible.
- Only irrigate at a rate that can infiltrate into the soil to limit run-off.
- Avoid irrigating close to impervious surfaces such as parking lots and sidewalks.

Landscaping

- When establishing new plantings, use alternative landscaping materials, such as drought resistant or native plants to reduce the need for irrigation and extensive application of fertilizers and pesticides.
- Follow proper fueling procedures for all equipment to ensure that petroleum products do not enter the stormwater system (see SOP 7: Fuel and Oil Handling Procedures).
- Fertilizers, herbicides, and pesticides should be properly used, stored, and handled (see SOP 12: Storage and Use of Pesticides and Fertilizer).
- Georgetown does not currently discharge into waterbodies: Nitrogen or Phosphorous IMPAIRED WATERBODIES/CATCHMENTS. Under MS4 Permit requirements, Georgetown acknowledges that if impairment status of any Georgetown waterbody should change, that blowing organic waste

material (grass cuttings, leaf litter) is strictly prohibited.

Snow Removal

- Store salt or sand for snow removal indoors under a roof or in a covered container and on impervious surfaces.
- See SOP 18: Winter Road Maintenance for more information on proper snow disposal and storage procedures.
- Any damage done to vegetated areas caused by plows or deicing materials should be repaired as early as possible in the spring.

Trash Management

- All waste and recycling containers must be leak-tight with tight-fitting lids or covers.
- Place waste and recycling containers indoors or under a roof or overhang whenever possible.
- Clean and sweep up around outdoor waste containers regularly.
- Arrange for waste and recyclables to be picked up regularly and disposed of at approved disposal facilities.
- Do not wash out waste or recycling containers outdoors or in a parking lot.
- Conduct periodic inspections of waste areas to check for leaks and spills.
- Ensure there are enough trash and recycling containers at appropriate areas.
- Monitor waste and recycling containers at heavily-used sites and on holidays to ensure that there is no overflow.
 - The following sites are known to have higher frequency of use or need more frequent inspection to prevent trash overflow: American Legion Beech.

Other Activities

- Provide pet waste stations with bags and trash receptacles where pets are permitted. Post signs describing the proper disposal of pet waste.
- All portable toilets should be staked down in flat, secure locations where they are less likely to be knocked down or blown over. They should be placed in a location that would retain any spillage from washing into the MS4 or receiving waters. Ensure routine maintenance and cleaning of portable toilets.
- Identify undesirable waterfowl congregation areas and take steps to prevent waterfowl droppings from entering the stormwater system or surrounding waterbodies.
 - Take measures to discourage congregation near waterbodies and the storm system (e.g., use strobe lights or reflective tape, establish no-mow zones to reduce available feeding areas, or plant thick vegetation along waterlines). If waterfowl congregation cannot be managed, then isolate the drainage from congregation areas away from the storm system and waterbodies.

Install signage to educate the public on the negative effects of waterfowl feces entering the stormwater system or nearby waterbodies in order to discourage public feeding. Alternatively, enact feeding bans.

Employee Training

- Employees who perform maintenance or other applicable work at municipal parks and open spaces are trained annually on these procedures and the proper operation of related equipment.

SOP 19: Operations and Maintenance of Parks and Open Spaces

- Employees are also trained on stormwater pollution prevention, illicit discharge detection and elimination (IDDE) procedures, and spill and response procedures.
- If services are contracted, the contractor should be given a copy of this and any applicable SOPs to ensure compliance with MS4 regulations.

**Inventory of Municipal Parks and Open Spaces within the MS4
Georgetown, Massachusetts**

Name of Park/Open Space	Location	Manager/Contact – Name, Position, Department, Phone Number	Potential Stormwater Pollutant Sources (e.g., trash containers, fertilizers, fuel)
Harry Murch Park	East Main Street	Peter Durkee Highway Surveyor Highway Department (978-352-5704) Parks & Recreation Commission, Jim Dimento (Chair) (978) 352-6851	Site is fertilized annually by the Highway Dept. (no fertilizer stored on site) Grass is mowed and clippings are left in place (not bagged), Site is carry in carry out for waste
Pentucket Pond Recreation Area	17 Pentucket Ave/Milton Way	Same as above	Grass is mowed and clippings are left in place (not bagged) Trash barrels and dumpster (town empties as needed), No fertilizer used
Littles Hill	4 Hillside Drive	Same as above	Grass is mowed and clippings are left in place (not bagged), No fertilizer used
East Main Street Park & Pillsbury Pond	184 East Main Street (4 lots -Pillsbury Ln R, Lisa Ln R)	Same as above	Grass is mowed and clippings are left in place (not bagged), No fertilizer used Trash barrels (emptied by town waste hauler)
West Street Soccer Field	West Street (Outside MS4)	Same as above	Grass is mowed and clippings are left in place (not bagged), No fertilizer used Trash barrels (emptied by town waste hauler)
Union Cemetery	East Main Street	Phil Trapani, President, Historical Society 978-352-5710 Michael Farrell Town Administrator (978-352-5755)	Mowed by contractor, no fertilizer used
